Bly ingeskakel vir meer inligting oor hierdie en ander interessante nuus items.

DIE SARL HF GG KOMPETISIE OP 29 AUGUSTUS

Die doel van die HF GG wedstryd is dat deelnemers soveel moontlik radio amateurs in Suider-Afrika op 20, 40 en 80 meter kan kontak en van 14:00 tot 17:00 UTC (16:00 tot 19:00 SAT) op Sondag 29 Augustus. Die uitruiling is 'n RST verslag en 'n opeenvolgende reeksnommer wat begin by 001. Elke QSO tel 2 punte. Stuur jou logstaat na zs4bfn@mweb.co.za nie later nie as 23:59 SAT op Vrydag 3 September 2021. Logstaat nommer 41 wen 'n SAR-lidmaatskap! Kry al die reëls op bladsy 86 van die 2021 Blouboek.

ICASA PUBLIC HEARING ON DRAFT EQUIPMENT AUTHORISATION REGULATIONS

ICASA held a public hearing about the draft equipment authorisation regulations. The SARL presented its case. It became clear that ICASA is looking at two scenarios. Homebrew equipment is part of the exclusion scenario. The SARL made a case to have kits included in this category. When it comes to amateur radio equipment manufactured commercially, then equipment authorization or type approval will be required. Judging from comments made by ICASA councillors it is clear that they are open to accepting conformity certificates from other jurisdictions . The SARL was asked to submit further documentation on issues raised at the hearing.

ICASA recently published the 2021 draft National Frequency Plan. The SARL has carefully studied the plan and has found some errors in respect of amateur allocations particularly in the 160 metre band and omission of the 40 MHz allocation. The SARL has submitted its findings to ICASA and has requested to make a presentation at the hearing scheduled for early September.
More details will be included in next week's SARL News.

SARL Next Generation Beacon fund.

The crowd funding initiative to collect funds for the SARL next generation beacon programme was initiated by AMSAT SA. The R25 200 collected to date is far from the R60 000 target to finance a beacon in the Karoo and the Western Cape. AMSAT SA and the SARL thank all who have contributed so far.

At the monthly meeting held on Thursday, the Beacon group reviewed the progress of testing of a telemetry and remote-control system to fit to the Bethlehem beacon and all future beacons. Work is also progressing on a reverse beacon monitoring solution where the telemetry system will also have the ability to automatically retrieve log files from the remote beacon monitoring software. Good progress is being made on a site in the Karoo as well.

To stay up to date with the beacon programme listen to Brian Jacob's Focus on VHF and above transmitted weekly on the programme Amateur Radio Today.

Help us to make it happen by donating to the fund and reach the target of R60 000 over the next month.

Visit www.amsatsa.org.za and make your contribution by clicking on one of the payment buttons for a R50, R250 or R1000 donation. The button will take you to the Payfast website where you need to enter your credit card details. Please also add your callsign after your surname.

Visit the Next Generation Beacon web page for articles, videos, updates and a list of donors. There are links on the SARL and AMSAT SA home pages.

HF VOORTPLANTINGSVOORSPELLING

Hannes Coetzee, ZS6BZP, berig dat die verwagte sonaktiwiteitsvlak laag tot gematig gaan wees. Tans is daar 'n paar sonvlekke sigbaar en daar is 'n moontlikheid van geringe C-klas sonfakkels.
Diegene wat hulle eie frekwensievoorspellings wil doen, kan 'n verwagte effektiewe sonvlektelling van sewe vir die week gebruik.
Radio amateurs kan laatmiddag DX openinge op die 17 tot 30 m bande verwag.
